Please call us if you have any queries. We'll be happy to help.

ABOUT THE SOAP

Droyt Clear Glycerine Soap is made by mixing three vegetable oils, coconut, palm and castor, with sodium hydroxide (caustic soda). We add Tate and Lyle Cane Granulated sugar to help the soap become transparent and feel soft on the skin, and Vitamin E as an antioxidant. Our philosophy is to try to make the best quality soap with the fewest ingredients and additives. We don't use any animal derived ingredients and so our soap is suitable for use by Vegetarians and Vegans. We have never conducted animal testing and ask our suppliers to confirm that the ingredients they supply to us are similarly produced.

MAILORDER

We aim to deliver orders as soon as possible after we receive them, During busy times it can take longer to prepare orders, which is why we ask our customers to allow up to 21 days for delivery. Most orders are delivered well before this time, however.

If you have ordered an item in the past, which is no longer on our price list, please give us a call and we will see what we can do. We have a large stock of soap and may be able to find the fragrance or shape that you prefer.
